## **INTRODUCTION**

Geography is the study of anything that varies over the surface of the earth, and geographers attempt to discern spatial patterns and identify the forces that interact to create or modify these patterns. Disaster is a sudden, calamitous event bringing great damage, loss, destruction and devastation to life and property. The damage caused by disaster is immeasurable and varies with the geographical location, climate and the type of the earth surface. This influences the mental, socio-economic, political and cultural state of the affected area.

Geographers study natural phenomena and work in areas as diverse as conservation, climate change, geology, meteorology, hazards, and natural resource management. Geographers understand human-environment relationships and how to use that information to manage natural resource sustainability and to protect the planet as a whole. The discipline of Geography has a distinct advantage in developing a more holistic understanding of global environmental challenges.

Against this backdrop this International Webinar on **“Geography, Disaster Management and Sustainable Development”** has been jointly orchestrated by International Academy of Science and Research (IASR), Kolkata and National Institute of Disaster Management (MHA, Govt. of India) on 27th and 28th January 2023.

The webinar is an ideal forum to discuss and disseminate information of knowledge and exchange of ideas between the stalwarts, research scholars and the students.

Academicians, faculties, Scientists, Environmentalists, Ecologists, Students and Research Scholars are encouraged to contribute and help shape the conference through submission of their research abstracts, papers and e- posters.

## **THEMES & SUB THEMES**

The theme of the webinar is **“Geography, Disaster Management and Sustainable Development.”**

Academicians, faculties, Scientists, Environmentalists, Ecologists, Students and Research Scholars are cordially invited to attend the webinar through Google meet and send their abstracts strictly adhering to the subthemes mentioned below:
